***REASONS FOR ALLOWANCE***

1. Claims 1-28 are allowed.
2. The following is an examiner's statement of reasons for allowance:: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 1-28, wherein the claimed invention comprises a first optical element, a second optical element with an index of refraction the same or different (embodiments) from the first optical element, the surface of the two optical element enclosing a gap for which a thermo-optical polymer having a index of refraction different from that of the first optical element is contained and a temperature controller coupled to the polymer, as claimed. The combination of all the claimed features are not anticipated or made obvious by the prior art and all of said features are relied upon for a determination of allowability.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
